

Willie's episode is one Scott would refer to as a "Chicken Soup Story." It's a powerful story of comfort and generational blessings. Willie grew up in a house with a hard-working father and a loving mother. From watching his father, Willie learned the importance of working hard to provide for his family. Growing up, Willie and his siblings felt "slighted" because their dad had fully given himself to pastoring a church. Willie even recalls that his dad nearly prioritized a revival service over his son's graduation.

Willie has become somewhat of an "expert" on raising daughters. Some of his top priorities are to show his daughters how much Christ loves them and how much he loves them. His family is heavily involved in church and one of his great joys in life is taking his daughters on "daddy-daughter dates" to show them his love and how they should be treated and respected by any man.
